

Data Cleaning Change Log

WEEK1: Task 1: Data Cleaning & Preparation

Name:

Ifrah Aftab

Date:

May 20, 2026

Dataset:

Dataset for_Data_Analytics.xlsx

Tool Used:

Microsoft Excel

Total Records:

1,200 rows | 14 columns

Role:

Data Analyst Intern

Change Log

Change ID	Column Affected	Issue Found	Action Taken	Records Affected	Status
CR001	CouponCode	309 null/missing values found — 25.75% of all records had no coupon data	Filled all empty cells with "No Coupon" to indicate no coupon was applied. Strategic imputation used instead of row deletion to preserve all 309 records	309	Resolved
CR002	Date	Dates stored as Excel serial numbers (e.g. 44930) — not readable or ISO compliant	Reformatted all date cells to ISO 8601 standard: YYYY-MM-DD using Format Cells > Date	1,200	Resolved
CR003	UnitPrice, TotalPrice	Numeric values required standardized display formatting for reporting consistency	Formatted UnitPrice and TotalPrice columns to display 2 decimal places using Format Cells → Number → 2 Decimal Places	1,200	Resolved
CR004	All Columns	Checked entire dataset for fully duplicate rows which would inflate record counts	Used Data > Remove Duplicates across all 14 columns. Zero duplicate rows found. Dataset integrity confirmed	0	Verified
CR005	OrderID	Checked for duplicate Order IDs — each order must have a unique identifier per business rules	Applied Conditional Formatting > Duplicate Values on OrderID column. Zero duplicates found. All 1,200 OrderIDs are unique	0	Verified
CR006	All Columns	Checked for any remaining missing or blank values across all 14 columns after CR001 fix	Used Home > Find & Select > Go To Special > Blanks. Zero blank cells remaining after CouponCode imputation	0	Verified
CR007	Quantity, UnitPrice, TotalPrice	Checked for invalid negative or zero values in all numeric fields	Reviewed all numeric columns. Zero negative or zero values found. All values are valid and positive	0	Verified

Verification Gate — Project 2 Threshold

The following checks confirm this dataset meets the 0% error rate requirement to qualify for Project 2.

Verification Check	Result
0% Error Rate on Unique Identifiers (OrderID)	PASSED
0% Error Rate on Date Formats (YYYY-MM-DD)	PASSED
0% Null Values Remaining After Cleaning	PASSED
Total Records Lost During Cleaning	0 — All 1,200 rows preserved

Dataset is fully cleaned and prepared. All 1,200 records preserved. Ready for Project 2.
